

OCP is easy to write

Owners' and Contractors' Protective Liability is a limited form of liability insurance designed for building owners who have contractors onsite to perform building or remodeling projects. This coverage protects the owner, not the contractor's work. We are also a market for O&CP on repair projects for plumbing, HVAC, Carpentry, etc. where the project owner wants to be protected.

Features

- Coverage for operations performed for the owner by the contractor at the specified location.
- Coverage for acts or omissions of the insured (owner) in connection with the general supervision of the contractor's operation.
- Coverage is for "bodily injury" and "property damage" only.

- "Completed Operations" coverage is not provided.
- The O&CP policy in most cases is primary.
- Coverage ceases at the earliest of the following:
 - Work on the project has been completed
 - The project has been put to its intended use
